

How Things Work – Waste & Recycling

Students will get a behind-the-scenes perspective of the local impact our waste has on our environment and economy, and how local organisations are reducing that impact through their operations and recycling programs.

- Tour BRI/McCallum's recycling depot
- Participate in an information and activity session with a representative from Sustainability Victoria
- Hear from those in the industry, and how they got there
- Learn about careers in the industry, what school subjects you need and what pathways you can take to work in the vital and growing industry of waste and recycling.
